

## Let's connect...

Are you looking for a role where you can make a contribution to the continued growth of a company in full expansion? Then look no further and read on!

### Who are we?

BKM-Orange provides quality ICT solutions in 4 domains. Unified Communications & Collaboration (UCC) solutions, IT solutions, Document & Visual solutions and Connectivity solutions. We take a one-stop-shop approach. With more than 25 years of experience, we have become a dependable reference point in the market. Our 230 employees, spread across our offices in Hasselt, Steenokkerzeel and Ghent, are specialists with experience and professional know-how, dedicating themselves every day to our 16,000 customers. BKM belongs to the Orange Belgium group, one of the leading telecommunications operators on the market. Together, we form a strong combination with powerful solutions and services for connectivity and ICT.

'We connect. We care.' That is what we strive for every single day. With the right business knowledge and the latest technologies, BKM takes away the hassle of time-consuming ICT issues for our customers. Our customers can rely on our one-stop-shop approach. That way, they can focus 100% on their core business.

Would you like to enhance our team? We are looking for:

## 2 NETWORK/SECURITY ENGINEERS (M/F)

### What is your role?

- You will assess and remedy network security vulnerabilities;
- You will be involved in the technological aspects and evolutions of our company and work closely with your colleagues in the team;
- You will independently follow up projects with customers and take the technical lead. On your own initiative, you will contribute to the continuous improvement of the quality of our services;

- You will support the pre-sales team by providing technical expertise in responding to requests for quotes for data network projects;
- You will install and configure all the components required in a LAN and WLAN architecture;
- You will design and configure all the monitoring tools required in a project;
- You will provide project documentation (as-built document, L1-L2-L3 topology design, etc.);
- You will support the Service Desk technicians at second and third line and participate in the service if necessary;
- You will contact suppliers for troubleshooting;
- You will communicate and report on the evolution of a project in a structured manner to the internal/external customer and to your manager.

## Who are we looking for?

- You have a Master's or Bachelor's degree in Information Technology or a related discipline;
- You will have at least 5 years' experience in networking and IT security;
- You will obviously have a strong knowledge of system security, network security and security design;
- You will have extensive experience with firewall solutions, switching and routing implementations;
- You will have a good overview of IT security risks and vulnerabilities;
- You will have experience with project-based work;
- You work in a structured, problem-solving, independent and proactive way;
- You will have technical knowledge of leading security vendors (Fortinet, Kaspersky, Barracuda, Palo Alto, HP Enterprise);
- You are driven, persevering and enthusiastic with strong communication skills;
- You hold a Security Certificate or other relevant certificates;
- You are both result and action-oriented;
- You can speak and write fluently in Dutch, English and French.

## What do we offer?

- A strong, healthy and growing organisation with a lot of ambition and appetite;
- A new position with a lot of responsibilities, independence and development opportunities;
- A full-time, permanent position;
- An attractive salary package with fringe benefits such as car, fuel card, laptop, mobile phone, and insurance;
- A dynamic and transparent organisation;
- A company that converts results into incentives and social activities of all kinds;

- A challenge!
